THE WARREN-TEED PRODUCTS CO. . COLUMBUS 8, OHIO

Wide antibacterial activity, low toxicity and virtual elimination of renal complications distinguish the use of Gantrisin\* 'Roche', a new and remarkably soluble sulfonamide. Highly effective in urinary as well as systemic infections, Gantrisin does not require alkali therapy because it is soluble even in mildly acid urine. More than 20 articles in the recent literature attest its high therapeutic value and the low incidence of side-effects. Gantrisin is now available in 0.5 Gm tablets, as a syrup, and in ampuls. Additional information on request. HOFFMANN-LA ROCHE INC • NUTLEY 10 • N. J.

iron

vitamin B complex

... these are known raw materials for erythrocyte maturation. All are contained in Pulvules 'Lextron F.G.' (Liver-Stomach Concentrate with Ferrous Gluconate and Vitamin B Complex, Lilly). "F.G." refers to ferrous gluconate, a well-tolerated iron salt preferred by many clinicians. Pulvules 'Lextron F.G.' prescribed according to individual requirements will adequately treat any type of anemia which responds to liver or iron therapy. Available in bottles of 84 or 500.

ELI LILLY AND COMPANY Indianapolis 6, Indiana, U.S.A.

# Speed...Comfort...Safety...

Start of hypodermoclysis. Alidase injected in right leg. No Alidase used in left leg.

Completion of hypodermoclysis. Right leg: comfort, safety, rapid absorption. Left leg: swelling, pain, slow absorption.

ALIDASE\* Searle (highly purified hyaluronidase) injected through the hypodermoclysis tubing makes it possible to administer subcutaneous fluids with the speed. comfort and safety of the intravenous route.

Clinical studies have demonstrated that Alidase markedly increases the rate of absorption of saline, plasma, glucose, Hartmann's or Ringer's solution. The absorption of penicillin, streptomycin, procaine and adrenalin is also facilitated.

The swelling, induration and discomfort which ordinarily accompany hypodermoclysis are negligible when Alidase is employed.

**USUAL DOSE:** One ampul per 500 to 1,000 cc. of hypodermoclysis fluid.

ADMINISTRATION: It may be: (a) injected through the wall of the rubber tube near the hypodermoclysis needle or (b) dissolved directly in the solution (when the amount of fluid to be injected is small).

#### WHEN OBESITY IS A PROBLEM

S. H. CAMP and COMPANY JACKSON, MICHIGAN

World's Largest Manufacturers of Scientific Supports

Offices in New York • Chicago Windsor, Ontario • London, England

Clinicians have long noted that the forward bulk of the heavy abdomen with its fatladen wall moves the center of gravity forward. As the patient tries to balance the load, the lumbar and cervical curves of the spine are increased, the head is carried forward and the shoulders become rounded. Often there is associated visceroptosis. Camp Supports have a long history among clinicians for their efficacy in supporting the pendulous abdomen. The highly specialized designs and the unique Camp system of controlled adjustment help steady the pelvis and hold the viscera upward and backward. There is no constriction of the abdomen, and effective support is given to the spine. Physicians may rely on the Camp-trained fitter for precise execution of all instructions.

If you do not have a copy of the Camp "Reference Book forPhysicians and Surgeons", it will be sent on request.

THIS EMBLEM is displayed only by reliable merchants in your community. Camp Scientific Supports are never sold by door-to-door canvassers. Prices are based on intrinsic value. Regular technical and ethical training of Camp fitters insures precise and conscientious attention to your recommendations.

### In Treating Para-nasal Infection ARCYROL Affords

### multiple action without reaction

Bacteriostatic, demulcent and detergent in its positive actions. ARGYROL constantly demonstrates its advantages for effective control of infection and restoration to normal function.

Additionally, its use does not handicap the restoration process by compensatory congestion, the experience so often suffered with many vasoconstrictors.

"Baby Talk for a Good Square Meal"

The introduction of the New Improved Biolac has met with wide professional interest. Made available as a product of the latest and the most modern refinements in manufacturing facilities, this prescription favorite is now better than ever.

NUTRITIONALLY RELIABLE: More than ever complete in known nutrients (when vitamin C is added), the New Improved Biolac meets every known nutritional requirement of the infant.

All essential fatty acids — with the volatile fraction held to a minimum — are provided by moderate amounts of especially combined fats.

Vegetable and milk sugars — for more satisfactory absorption — are supplied by Biolac's carbohydrate content. Further carbohydrate supplementation is unnecessary.

In protein content, the New Improved Biolac is significantly higher than that of human milk, yielding small, easily digested curds, less allergenic than those of untreated cow's milk.

Prophylactically high levels of such important mineral factors as iron, calcium and phosphorus are incorporated in the New Improved Biolac, together with vitamins A,  $B_1$ ,  $B_2$  and D. Infant caloric requirements, too, are fully met by Biolac's 20 calories per fluid ounce in standard dilution.

PHYSICALLY IMPROVED: A higher and more stable degree of emulsification of the New Improved Biolac—thereby facilitating digestion—has been brought about by the utilization of every refinement, and the most modern equipment, known to modern infant food manufacturing.

Preparation for feeding is easily calculated; quickly completed — 1 fl. oz. New Improved Biolac to  $1\frac{1}{2}$  fl. oz. water per pound of body weight.

NOW, BETTER THAN EVER! The New Improved Biolac can be used interchangeably with the former Biolac which has the same percentage composition of nutritional factors... When you prescribe the New Improved Biolac (it costs no more) you may do so with complete confidence. Available only in drugstores, in cans of 13 fl. oz.

# IMPROVED BIOLAC

Attention has recently been drawn to "an interesting approach" to the control of psoriasis and neurodermatitis. Perlman<sup>2</sup> has reported that following the oral use of undecylenic acid, psoriasis was relieved completely in 3 out of 17 patients, and was partially relieved in the remainder. "Relief of itching is sometimes noticed as early as two days after institution of treatment . . . undecylenic acid seems to hold a great deal of promise in the improvement and possible prevention of recurrences of psoriasis and neurodermatitis."2

SEVINON\* is available in gelatin capsules containing 0.44 Gm. undecylenic acid, highly purified for oral use. The dosage employed by Perlman<sup>2</sup> corresponds to 5 to 6 capsules three times daily by mouth, continued in some cases for as long as six months.

# maintaining urinary antisepsis without distressing the patient

Comprehensive clinical evidence establishes that MANDELAMINE (methenamine mandelate) is effective against Escherichia coli, Staphylococcus aureus and albus, and certain streptococci. Comparative studies indicate its bacteriostatic and bactericidal effectiveness to be approximately the same as that of the sulfonamides or streptomycin.

Because MANDELAMINE therapy is exceptionally well tolerated, patients willingly adhere to the prescribed regimen.

DOSAGE: Adequate dosage is important; for maximum effect, adults should take 3 or 4 tablets t.i.d.; children in proportion.

Complete literature and samples sent to physicians on request.

#### outstanding features

- Has wide antibacterial range
- No supplementary acidification required (except when urea-splitting organisms occur)
- Little or no danger of drug-fastness
- Is exceptionally well tolerated
- Requires no dietary or fluid regulation
- Simplicity of regimen 3 or 4 tablets t.i.d.

#### for bome treatment . . . a simple physical method for intrapelvic heat therapy

Reich-Nechtow\* Intrapelvic Hydrothermy Apparatus

Designed for use both in the doctor's office and for home treatment by the patient...

Indicated in cases of salpingo-oophoritis, annicated in cases of salpingo-oophoritis, salpingitis, parametritis, chronic pelvic peritonitis, hypoplastic uterus, adnexal inflammatory masses and pre- and post-operatively in inflammatory pelvic diseases.

The apparatus consists of a latex bag for insertion in the vagina, with an in-

flow tube with funnel end for attachment to a water faucet and an outlet tube. Intrapelvic heat produced by the flow of warm water through the apparatus induces muscle relaxation, decreased arterial tension, increased circulation and dilatation of peripheral vessels with subsequent decongestion of deeper vessels. The increase in circulation results in a local increase in phagocytic leucocytes, increased cellular metabolism and absorption of exudates.

#### R Cabbages

Once upon a time a blacksmith fell ill of a strange disorder. After eating a dish of cabbage, he fully recovered. Some weeks later his neighbor, the tailor, developed similar symptoms; cabbage was promptly administered but, alas, the tailor died. A would-be scientist in the village concluded that cabbage was a specific for the disorder, but in blacksmiths only; for tailors he pronounced it worthless and even dangerous.

The physician of today requires dependable evidence for the usefulness of his therapeutic agents. He also insists upon uniform, dependable purity for every drug that he uses.

For over 82 years physicians have relied on the uniform, dependable purity of Mallinckrodt products.
